

Suave Charm

Before the hair was cut it was thoroughly washed with Depot 101- Normalizing Daily shampoo. Following the wash, styling product 301- Matte Paste was applied. It's known to change the game by lending the hair a desirable volume which appears full but owns a medium hold. The final dapper look was achieved through some genuine use of finishing product 303-Modelling Wax.

Blow dryer, vent brush and a small round brush played the savior tools during this process. Smart partitioning aesthetically faded into sweeping layers that framed the face to spice up the invincible look.
